FOLLOWUP SURVEY OF

HIGH SCHOOL SCIENCE TEACHERS

PHASE I

SWEPT Evaluation
I. YOUR INSTRUCTIONAL PRACTICES

Questions 1 through 15 ask you to reflect on your instructional practices in a specified course. Ideally, this course should be the same as the “target” course you identified in the SWEPT survey you completed last spring and which appears on the label on the cover of this questionnaire. If you are no longer teaching this course, please select a new target course that meets the following criteria: (1) the subject is biology, chemistry, or integrated science; (2) the curriculum is not AP, Honors, or otherwise considered accelerated by your school. Please write the title of your target course selection in the space provided below.

Title of course ____________________________

NOTE: The duration of high school courses can vary (e.g., 1 semester, 2 semesters, or a trimester), and students’ schedules may change mid-year. Therefore, please reflect on your teaching practices and experiences since you began teaching the class of students currently enrolled in this course when answering these questions.

1. In this course, how much emphasis did you give to each of the following goals or objectives? (Circle one number on each line.)

   a. Integrating the course curriculum with other subjects or fields of study ................................................................. 1 2 3 4
   b. Teaching facts, rules, or vocabulary........................................ 1 2 3 4
   c. Showing the importance of the subject in everyday life ................................................................. 1 2 3 4
   d. Increasing students’ interest in the subject and in pursuing further study ................................................................. 1 2 3 4
   e. Encouraging students to explore alternative explanations or methods for solving problems.............. 1 2 3 4
   f. Preparing students for taking standardized tests in the subject................................................................. 1 2 3 4
   g. Fully covering the course curriculum as prescribed by the school/district/state ................................................................. 1 2 3 4
   h. In-depth study of selected topics or issues, as opposed to exposure to a broad range of topics............. 1 2 3 4
   i. Understanding the theoretical concepts and ideas underlying scientific or mathematical applications..... 1 2 3 4

2. Approximately how often did you use each of the following teaching methods in this course? (Circle one number on each line.)

   a. Lecture or talk to the whole class ................................. 1 2 3 4 5
   b. Teacher-led whole-class discussions ................................. 1 2 3 4 5
   c. Students responding orally to questions on subject matter covered in class or homework.................. 1 2 3 4 5
   d. Student-led whole-group discussions or presentations ................................................................. 1 2 3 4 5
   e. Students working together in cooperative groups..... 1 2 3 4 5
   f. Reviewing homework or other assignments............ 1 2 3 4 5
3. Approximately how often did you have students engage in the following learning activities in this course? (Circle one number on each line.)

<table>
<thead>
<tr>
<th></th>
<th>Never</th>
<th>1-2 times a month</th>
<th>1-2 times a week</th>
<th>Almost every class</th>
<th>Every class</th>

</tbody>
</table>
5. During a typical week, approximately how much time did you spend outside of regular school hours on planning and preparing for teaching this course?  
Number of hours __________

6. Which textbook (or commercially prepared workbook) constitutes the primary resource that you used in this course?  
(NOTE: If you used NO textbook or workbook in this course, skip to question 11.)

Title: ____________________________________________
Author: __________________________________________
Publisher: ________________________________________
Publication date/edition: __________ / __________

7. Approximately what percentage of this textbook/workbook did you cover in this course? ______%  

8. Did you use the tests that the publishers included with the textbook/workbook? (Circle only one.)

Rarely or never .............. 1  
Sometimes ..................... 2  
Frequently ..................... 3  

9. Please give your opinion about each of the following statements as related to this textbook/workbook.  
(Circle one number on each line.)

<table>
<thead>
<tr>
<th>This textbook:</th>
<th>Strongly disagree</th>
<th>Disagree</th>
<th>Not sure</th>
<th>Agree</th>
<th>Strongly agree</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Is at a reading level that is appropriate for most of the students taking this course</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>b. Helps develop problem-solving skills</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>c. Provides good review questions and problem sets</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>d. Explains concepts clearly</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>e. Provides challenging suggestions for projects, further reading, and other assignments</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>f. Covers the right range of topics</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>g. Satisfactorily covers topics in depth</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>h. Makes interdisciplinary connections between subject areas</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>i. Is considered interesting by most students taking this course</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>j. Other (specify) ______________________</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
</tbody>
</table>

10. If you disagreed with any of the items in question 9, above, please briefly describe the problems you have seen with this textbook/workbook.

____________________________________________________________________________________________________________________________________________________________________________________________________________________
11. To what extent did you use each of the following types of assessment to determine student progress and achievement in this course? (Circle one number on each line.)

<table>
<thead>
<tr>
<th>Type of Assessment</th>
<th>Not at all</th>
<th>Slight extent</th>
<th>Moderate extent</th>
<th>Great extent</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Pre-tests before beginning a new unit</td>
<td></td>
<td>1</td>
<td>2</td>
<td>3</td>

<tr>
<td>h. Written explanations of thought processes (e.g., journals, essays)</td>
<td></td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>

NOTE: Questions 12-15 not used in this version.

Please continue on the next page with Question 16.
II. YOUR ATTITUDES AND BELIEFS ABOUT TEACHING

16. Please indicate how confident you feel about the following aspects of your teaching at this time. (Circle one number on each line.)

<table>
<thead>
<tr>
<th></th>
<th>Not at all</th>
<th>Slightly confident</th>
<th>Moderately confident</th>
<th>Very confident</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Your knowledge about the application of the subject to everyday life</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>b. Your ability to advise students about job opportunities in the subject area</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>c. Your ability to advise students about opportunities to receive further training/experience in the subject area</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>d. Your ability to use inquiry-based instructional practices</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>e. Your ability to determine the depth, breadth, and pace of coverage of material in your teaching</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>f. Your ability to develop appropriate and authentic assessment tools</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>g. Your ability to supervise your students' research projects</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>h. Your ability to mentor beginning teachers</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>i. Your ability to make presentations at teacher inservices or professional meetings</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>j. Your ability to incorporate technology (computers, the Internet, laser disks, etc.) into your teaching</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
</tbody>
</table>

17. To what extent do you feel each of the following statements describes the kind of teacher you are at this time? (Circle one number on each line.)

<table>
<thead>
<tr>
<th></th>
<th>Not at all</th>
<th>Slight extent</th>
<th>Moderate extent</th>
<th>Great extent</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. I am motivated to expand on the instructional techniques that I use</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>b. I am motivated to change the way I use hands-on materials and manipulatives in my teaching</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>c. I am motivated to use more technology in my teaching</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>d. I consider myself a &quot;subject matter expert&quot; in my main teaching field</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>e. I consider preparing students for the kinds of expectations they will encounter in a work setting as an important part of my job</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>f. I believe I can truly make a difference in the lives of my students in terms of their choices for further education and their careers</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
</tbody>
</table>
18. What do you consider to be your greatest strengths as a teacher? Please be as specific as you can. Think about both areas of content mastery and instructional strategies when answering this question.

____________________________________________________________________

III. YOUR SCIENCE CURRICULUM

Questions 20 through 22 ask about science topics that you covered in this course since it began (i.e., since the current class of students enrolled).

20. The following skills might be included in any science curriculum. Please put a check next to the skills that you covered in this course.

   a. Interpret and draw conclusions from tables and graphs ........................................
   b. Understand correct use of experimental controls .............................................
   c. Know correct use of laboratory apparatus....................................................
   d. Know how to make solutions of a given concentration ..................................

       Check if covered

       __________

       __________

       __________

       __________

 NOTE: If your target course includes chemistry/physical science topics only, answer Question 21. If your target course includes biology/life science topics only, answer Question 22. If your target course includes chemistry/physical science and biology/life science topics, answer both Questions 21 and 22.
21. Which of the following chemistry and physical science content areas did you cover in this science course? Please put a check next to the bulleted topics that you covered in this course.

### A. Properties of Matter

1. **Physical properties**
   - Know some of the physical properties of matter
   - Know the meaning of STP
   - Understand the interrelationships of density, volume, pressure, and temperature
   - Determine the specific heat of a substance
   - Understand Avogadro’s Principle (number)

2. **Chemical properties**
   - Understand some chemical properties of given substances, such as carbon dioxide and oxygen
   - Distinguish between chemical and physical properties (e.g., rusting and combustion)

3. **States of matter**
   - Understand that matter can be found in different states as determined by physical changes such as freezing, boiling, or evaporation
   - Interpret graphs relating to the physical properties of water

4. **Classification of matter**
   - Understand how certain forms of matter are classified

5. **Solubility**
   - Define solubility and determine the factors affecting solubility, such as pressure and temperature
   - Interpret a solubility graph
   - Know the definition of a saturated solution
   - Understand how to make a molar solution

### B. Atoms, Elements, and Molecules

1. **Atomic structure**
   - Understand what constitutes an ion
   - Identify the three basic particles of matter, their charges, and relative masses

2. **Symbols and formulae**
   - Understand the meaning of chemical symbols and formulae
   - Know the rules necessary to write chemical formulae

3. **Chemical equations**
   - Understand that quantities in a chemical reaction are based on stoichiometric relationships
   - Know how to balance a chemical equation

4. **Periodic table**
   - Recognize that the placement of elements on the periodic table is a function of their atomic structure
   - Use the periodic table to predict activity and electronegativity

5. **Bonding**
   - Differentiate between ionic and covalent bonds
   - Understand electron configurations
   - Understand the makeup of matter in terms of molecular structure and attractive forces (intramolecular and intermolecular bonding)
   - Understand the relationship between the properties of a molecule and its structure
C. Chemical and Nuclear Reactions

1. Energy and changes of state
   - Understand kinetic molecular theory
   - Know how changes of state impact heat content

2. Chemical reactions
   - Recognize examples and know products of chemical reactions
   - Recognize an exothermic reaction
   - Understand the parameters necessary for spontaneous reactions
   - Use collision theory to explain how the rate of a reaction is determined
   - Use Le Chatelier’s Principle to predict a shift in equilibrium
   - Understand how a catalyst works

3. Acids, bases, and salts
   - Know some characteristics of acid/base reactions
   - Know how to classify a solution as acidic, basic, or neutral

4. Radioactivity
   - Understand the meaning of half-life and use this understanding to construct a graph of activity over time
   - Know why fusion is not yet a viable energy source

22. Which of the following biology or life science content areas did you cover in this science course? Please put a check next to the bulleted topics that you covered in this course.

A. Change and Evolution
   1. Diversity of life on earth
      - Recognize key characteristics of major groups of organisms and relate structure to function
      - Recognize the order in which organisms first appeared on earth
   2. Genetic variation within a species
      - Explain some of the mechanisms of genetic variation (e.g., solving simple genetic problems)
   3. Theories of adaptation and natural selection
      - Recognize various mechanisms of change (e.g., behavioral adaptations)
   4. Changes in diversity over time
      - Recognize phylogenetic relationships and understand what can be determined from fossil records
      - Recognize causes of extinction

B. Cells and their functions
   1. Cells as systems
      - Understand the cell as a living system
   2. Information transfer in cells
      - Know the structure of DNA and understand its roles in protein synthesis
   3. Energy transfer
      - Understand basic principles of photosynthesis and cellular respiration
   4. Communication among cells
      - Understand the role of specialized cells in carrying out life functions (e.g., nerve cells and immune protection)
C. Organisms

1. Reproduction, growth, and development
   • Know that a cell is the fundamental unit of a living organism
   • Understand meiosis and mitosis

2. Life cycles
   • Know which organisms are used to make certain foods

3. Functions and interactions of systems within organisms
   • Identify major organ systems of the human body, state their major functions, and describe some of their interactions
   • Recognize examples of how organisms maintain stable internal conditions
   • Understand nutrition in light of wellness and health

D. Ecology

1. The interdependence of life: populations, communities, and ecosystems
   • Understand how interactions between living and non-living components of an ecosystem affect the functions of that system as a whole
   • Know how ecosystems respond to natural and human changes in the environment
   • Predict changes in the size or growth rate of a population using mathematical models
   • Understand energy flow in ecosystems

THANK YOU VERY MUCH FOR COMPLETING THIS SURVEY.
